

Auxiliary Boiler System

This training is tailored to meet the needs of all engine room personnel. Our training focuses on systems rather than individual equipment.

To deliver up-to-date, realistic training that provides knowledge, confidence, and competence for safe and cost-effective operation of the auxiliary boiler system.

Intended Learning Outcome/s

After the training/assessment, the participant/s shall be able to:

- Understand the various systems and how each piece of equipment in the system has an impact on other equipment in the system
- Understand how operation are planned and carried out in accordance with established rules and procedures to ensure safety of operation
- Deviations from the norm are promptly identified and rectified
