

Basic Lathe Machine Operation

This course aims to provide knowledge, understanding, and practical applications for engine personnel using lathe machines with tool bit grinding and drilling, leading to competent skills in lathe machine operations.

Training Outcome/s

After the training, the participants must be able to:

- Apply safe working practices in lathe machine and grinding operation
- Use equipment, tools, and accessories in lathe machine.
- Conduct HSS tool and drill bit grinding operation.
- Interpret technical drawing.
- Conduct lathe machine operation.

Qualifications

Engine personnel who require Lathe Machine Operating Competencies.
