

Crane Maintenance and Troubleshooting Course

This course aims to enhance the knowledge, understanding, and skills of engine personnel regarding the operation, maintenance, and repairs of marine deck cranes. It provides interactive lectures, hands-on demonstrations, practical exercises, case studies, and assessments using an actual NMF deck crane electrical control panel, actual control cabin equipment, and miniaturized crane equipment.

Training Outcome/s:

After the training, participants must be able to:

- Monitor the condition of marine deck cranes;
- Operate marine deck cranes; and
- Conduct maintenance on marine deck cranes.

Entry Standard/s:

- Engine Officers
- Prospective ETO who are part of the Training Program
