

# Familiarization in Hybrid Exhaust Gas Cleaning Systems Webinar

The webinar aims to provide Marine Engineering Officers with updating training on the operation of hybrid V-type marine exhaust gas cleaning systems following MARPOL 73/78 Annex VI regulations, maritime industry standards, and operation manuals.

## **Intended Training Outcome/s:**

**After this training, the trainees should be able to:**

- define the MARPOL 73/78 Annex VI requirements related to the use of fuel oil following Resolution MEPC.320(74),
- compare different local regulations of air pollution prevention requirements against international regulations,
- define the different exhaust gas cleaning system technology,
- identify the functions of the wash water treatment system,
- Identify the functions of the exhaust gas monitoring system., and
- comply with local regulations regarding wash water discharging from exhaust gas cleaning systems.

## **Entry Standards:**

Must be an Operation or Management Level Engineer Officer, ETO.
