

MODULE 1 Alfa Laval Marine and Power Operation and Maintenance of Ship's Fuel, Lube Oil, and Central Cooling Systems

This training is tailored to meet the needs of all engine room personnel. Our training focuses on systems rather than individual equipment. All installed equipment is manufactured by Alfa Laval.

To deliver up-to-date, realistic training that provides knowledge, confidence, and competence for safe and cost effective operation of the auxiliary machinery systems.

Intended Learning Outcome/s

After the training/assessment, the participant/s shall be able to:

- Understand the various systems and how each piece of equipment in the system has an impact on other equipment in the system
- Operate the system in manual and automatic mode
- Understand the responsibilities and duties needed in operating the various systems

Course Prerequisite & Qualification

Engineers and Electrician
