

Reefer Container Handling Familiarization Training

This course aims to provide deck and engine personnel a familiarization on the proper and safe handling of shipboard reefer containers. It covers interactive discussions, hands-on demonstrations and practical exercises in the monitoring of reefer containers onboard ships using an actual reefer equipment installed in the training room

Training Outcome/s

After the training, the participants must be able to:

- Perform safe handling of shipboard reefer containers.
- Record conditions of shipboard reefer containers.

Entry Standard/s

- Engine personnel
- Deck personnel
