

Reefer Container Maintenance and Troubleshooting

The course aims to enhance the competency of engine personnel in performing maintenance and repairs of shipboard reefer containers.

Training Outcome/s:

After the training, participants must be able to:

- Demonstrate proper operation and testing of reefer container systems.
- Perform maintenance and repairs of shipboard reefer containers.

Entry Standard/s:

Engine personnel who have successfully completed a course on Refrigeration and Air-Conditioning Systems (RACS) and Reefer Container Handling Familiarization Training (RCHFT).
