

Working Aloft with Scaffolding

The course covers lectures, demonstrations, practical exercises, and assessments in safe practices when working aloft, working over the side, working at heights inside cargo holds and ballast tanks, and the permit to work systems meeting the requirements specified in relevant sections in Table A-II/5 of the STCW Code Manila Amendments and the industry's best management practices taking into account the guidelines set forth in the United Kingdom's Maritime Coastguard Agency's Code of Safe Working Practices for Merchant Seamen Consolidated Edition.
