

# Working at Height Supervisor

Reducing the threat posed by the possibility of falling from heights, a common accident onboard is a highly imperative responsibility of a Working at Height Supervisor. A Supervisor is required to have the ability to perform the first-line emergency response, assess site-specific risks, and implement preventive measures to develop a safety culture for working at heights. Per LOLER standards, this course will train enrollees on the roles and responsibilities in implementing preventive measures and help them become competent Working at Height Supervisor
